

Internship Position

A BLUE THING IN THE CLOUD SL is looking for a talented electronics engineering student. Experience is not required, but at least you should be passionate with technology and microcontrollers.

Even though you could not have any professional experience, at least you should demonstrate your ability creating schematics, printed circuit boards and developing firmware and software.

If you are so freak that you have some public Github repository, some open hardware or software project, We will be interested in your profile.

The creativity is a highly appreciated talent in this company, so if you are a creative person, and you create in any other field, like music, literature, picture or whatever, please let us know.

We offer to our employees the best conciliation policies that you will ever find. Here we are only interested in getting the work finished at the due date. So you can work from home (or from caravan, your boat or from any other place in the world), at the hours you want. We have a program for helping our employees to work while they travel worldwide, helping them in their cultural and personal growth.

Additionally, the company is engaged to provide life and health private insurance to our employees, and our target is to be able to work only 35 hours per week from 2022.

We ensure you that all candidates will be treated fairly and with dignity and respect regarding their gender, sex, sexual orientation, age, religion, race or civil state... We are only interested in your engineering skills.

There are real possibilities of being hired after the internship.

We are a fair company and we contribute to our society with a social responsibility program. As an example, we sponsor the Adapted Sailing Team of Gran Canaria, helping disabled people to sail. This year, our team recently won the Spain's Cup. We also contribute donating to organizations like AECC. Are you engaged to a cause or to an NGO? Let us know and we could also help you.

Candidates are invited to send their CV with a presentation letter to Javier Longares Abaiz, CEO of the company: contacto@javierlongares.com
