

EMPLOYMENT OFFER AT DIVE MEDICAL S.L.

DIVE Medical is a health tech startup founded in February 2020 by a passionate team devoted to making early eye care a reality. With our proprietary technology based on eye tracking and artificial intelligence, we provide an automatic, fast, and accurate exploration of the visual function even in non-verbal patients. Being able to examine vision from six months of age and in patients unable to cooperate for neurocognitive issues, we want to generate a high positive impact and allow everyone to live at their full potential.

If you are thrilled at the idea of disrupting healthcare and working in a horizontal and dynamic team, we offer a great opportunity for an Optometrist to be part of our company. The candidate should be located in Zaragoza.

Responsibilities:

- Actively participate in all the phases of the development of new visual and cognitive digital tests, from the definition of specifications and design to the refinement and validation.
- Participate in the execution of clinical trials: design of clinical protocols, recruitment of participants, and analysis of results.
- Continuously communicate with the engineering team and external collaborators to meet the company objectives
- Write scientific papers related to the project and participate in conferences.
- Collaborate and actively participate in brainstorming and development of new ideas that help the team and the company move forward.
- Travel to collaborating sites as part of the execution of clinical trials.

Education

- Optometry degree.

Experience to value

- Experience in optometry clinical practice, in particular with children and people with neurocognitive pathologies.
- Experience in the design and execution of clinical trials according to the Spanish and European regulations.
- Experience interacting with patients that participate in clinical trials: sharing the information of the project and collecting the informed consent.

Additional skills

- Ability to clearly communicate effectively with multidisciplinary teams.
- Ability to work independently and, at the same time, be part of a multidisciplinary team.
- Ability to rapidly adapt and respond to changing priorities.
- Ability to manage a wide range of varied tasks simultaneously and prioritize.
- Demonstrated organizational and time management skills, attention to detail.
- A strong ethical mindset.

Devices for an Integral Visual Examination

Languages

Excellent command of Spanish and English language and grammar, both verbal and written, will be mandatory.

Benefits

- Opportunity to be part of the multidisciplinary team of managers, clinicians, and computer engineers building a company to transform health through excellence in technology and knowledge.
- Create a positive social impact, as well as a great economic impact, offering more accessible, early and egalitarian global health.
- Dynamic, ethical, enthusiastic, and international professional environment where we all commit and share openly in order to achieve a greater purpose.
- Partly remote and flexible schedule.

Application Procedure

All applications must include:

- A full CV including contact details
- Two contacts for further reference.

All applications must be submitted by e-mail to info@dive-medical.com
