SPECIAL OFFER ON NMR PORTFOLIO

Not just good or great. But gold.

As a leader in life sciences, we offer a catalog of more than 300,000 products. One of our core specialties is NMR, for which we produce premium quality solvents, standards, CRMs, and stable isotope reagents, as well as dedicated NMR tubes and accessories.

Our innovative certified reference materials (CRMs) are ideal for a wide range of new applications in quantitative NMR (qNMR), such as metabolomics, biomarker discovery, and physiological pathway research. All our CRMs are traceable to NIST SRM, and produced according to ISO/IEC 17025 and ISO Guide 34 criteria. This double accreditation represents the “gold standard” in reference materials – the highest quality possible.

High Quality NMR Solvents

High quality solvents are essential for the rigorous demands of NMR research and analysis. We are passionate about quality. That's why we provide the widest range of NMR solvents with excellent chemical purity and the highest isotopic enrichment possible.

To make sure we always offer you the finest quality, we consistently review and improve our methods for solvent purification and water content reduction. And, all our NMR solvents undergo strict quality control testing during production and packaging.

For more specific requirements, we support you with the convenience of customized products and packaging. Our glass bottles, ampules, and septum bottles for NMR solvents are available in the broadest range of configurations and sizes.

Benefits

- Reliable results in NMR spectra
- Excellent chemical purity and highest isotopic enrichment
- Reliable deuteration degrees
- Determination of water content in Karl Fischer and NMR
- Safe, easy handling with septum bottles and glass ampules
- Flexible choice of packaging formats
