

Ocular Pathology Review Course: June 24-25, 2020

Ten places in the Pathology section of the [14th Biennial Magrane Basic Science Course in Veterinary and Comparative Ophthalmology](#) are being reserved for ACVP/ECVP residents, Diplomates, and other formal pathology trainees. The Pathology section is given as a two-day segment of the course and offers broad exposure to ophthalmic pathology of domestic species through didactic lectures and group discussions. The course is not intended as a hands-on slide review, but rather provides an entry-level review of diseases and processes affecting ocular structures emphasizing nomenclature, key diagnostic features, and diagnostic challenges.

LOCATION: Davis, CA; School of Veterinary Medicine, UC Davis

ELIGIBILITY: Enrollment in the Ocular Pathology Review course is open to individuals in approved ACVP and ECVP residency programs as well as graduate students in veterinary pathology, International university faculty teaching veterinary pathology, international trainees in veterinary pathology, and individuals with an interest in ophthalmic pathology.

Ocular Pathology Review Course Instructors:

Phil Labelle, DVM, DACVP
Antech Diagnostics (Ottawa, Canada)

Carol Naranjo Freixa, LV, DACVP, DECVP, PhD
IDEXX Laboratories (Barcelona, Spain)

Leandro Teixeira, DVM, MS, DACVP
Comparative Ocular Pathology Laboratory of Wisconsin
University of Wisconsin-Madison

Continuing Education Credits:

The two-day Ocular Pathology Review Course will provide 14 hours of continuing education credits.
