Royal Veterinary College, Hertfordshire, United Kingdom**

Residency in Veterinary Anatomic Pathology

Applications are invited for a residency (three-year postgraduate training programme) in veterinary anatomic pathology. The successful applicant will enrol onto a Masters of Veterinary Medicine (MVetMed) programme whilst receiving advanced training in diagnostic gross pathology and histopathology covering multiple domestic, farmed and laboratory species. Residents engage in teaching of final year veterinary students on rota with faculty staff, and progressively assume independent reporting of diagnostic anatomic pathology cases under faculty supervision. Residents are also involved in scientific research and will be expected to submit manuscripts for publication based on their research work during the three-year programme. This programme aims to prepare residents for a career as a veterinary anatomic pathologist, and to successfully complete the anatomic pathology certifying examination administered by The American or European College of Veterinary Pathologists (ACVP/ECVP).

This residency is open to veterinary graduates holding a degree [registrable with the Royal College of Veterinary Surgeons](#). The tax-free stipend for the Residency starts at £24,500 per annum (subject to review), and increases by annual increments conditional on satisfactory progress and assessment.

The expected start date for the successful candidate will be July 2023.

For informal discussions about this residency please contact Dr Jonathan Williams
(jonwilliams@rvc.ac.uk)

Closing date: Sunday 20th November 2022

Expected Interview date: January 2023
